

New records of mites (Acarina, Mesostigmata) from Slovakia

Peter FENĎA & Erika SCHNIEREROVÁ

Department of Zoology, Faculty of Sciences, Comenius University, Mlynská dolina B-1, SK-84215 Bratislava, Slovakia; tel.: +421 7 60296249, fax: +421 7 65429064, e-mail: fenda@fns.uniba.sk

Parasitidae

Pergamasus (Triadogamasus) noster (Berlese, 1903)
Material examined: SW Slovakia, Jakubovské rybníky fishponds, Borská nížina lowland (7567d) (= grid reference number of the Databank of the fauna of Slovakia), 10 March, 1999, 1 ♀ from nest of *Acrocephalus scirpaceus* (Hermann, 1804) on reed (*Calamagrostis* sp.) in reed-grown of pond's shore; SW Slovakia, Dobrohošť-Dunajské Kriviny, Podunajská rovina plain (8070a), 25 Nov., 1994, 1 ♀ from combined nest of *Parus major* Linnaeus, 1758 and *Apodemus* sp., situated in a nest-box in floodplain forest. First records from Slovakia.

Rhodacaridae

Dendrolaelaps (Foveodendrolaelaps) brevipilis (Leitner, 1949)
Material examined: SW Slovakia, Jakubovské rybníky fishponds, Borská nížina lowland (7567d), 23 June, 1998, 1 ♀ from nest of *Fulica atra* Linnaeus, 1758, situated on the water surface in reed-grown. First record from Slovakia.

Punctodendrolaelaps latior (Leitner, 1949)
Material examined: SW Slovakia, Jakubovské rybníky fishponds, Borská nížina lowland (7567d), 25 May, 1999, 6 ♂♂, 13 ♀♀ from nest of *Fulica atra* situated on water surface in reed-grown and 1 ♀ on reed (*Calamagrostis* sp.). First records from Slovakia.

Phytoseiidae

Amblyseius (Amblyseius) patrius Karg, 1970
Material examined: SW Slovakia, Stankovany-Federov village, Veľká Fatra Mts (6881c), 22 June, 1989, 4 ♀♀ from nest of *Turdus* sp. situated in spruce forest. First record from Slovakia.

Proprioseiopsis (Amblyseius) levis (Wainstein, 1960)
Material examined: SW Slovakia, Jakubovské rybníky fishponds, Borská nížina lowland (7567d), 10 March, 1999, 1 ♀ from nest of *Acrocephalus scirpaceus*; SW Slovakia, Čičov-Lyon, Podunajská rovina plain (8272a), 23 June, 1997, 1 ♀ from nest of *Izobrychus minutus*; SW Slovakia, Šúrsky rybník fishpond, Podunajská rovina plain (7769c), 4 June, 1998, 2 ♀♀ from nest of *Fulica atra*. The specimens were found in nests situated on water surface in reed-grown of pond shore or dead arm shore. First records from Slovakia.

All specimens were identified by the authors according to KARG (1993) and SHCHERBAK (1980). The material is deposited in the Department of Zoology, Faculty of Sciences, Comenius University, Bratislava in the author's collection.

Acknowledgements

The investigations were supported by the Slovak Grant Agency VEGA, grant No. 1/6163/99. I express my deep thanks to D. Cyprich, M. Krumpál and P. Rác for collection and identification of some bird's nests.
